14 Suppress sectionnumbering

No need to write `section*` each time to avoid section numbering.

```
% Suppress sectionnumbering
\makeatletter
\renewcommand\@secntformat[1]{}

```

15 Lists

15.1 With letters

18 Include another latex file

```
\input{another_file}
```

Hi from another file :P

Note: using `include` instead of `input` will generate a new page.

19 If with xifthen packge

```
\begin{tikzpicture}
\foreach \x in {1,...,10}
{ \node[circle,draw] (\x 1) at (0,\x) {\x};
  \node[circle,draw] (\x 2) at (2,\x) {\x};
  \ifthenelse{\NOT \x = 4 \AND \NOT 7 = \x}{\draw (\x 1) -- (\x 2);}{}
}
\end{tikzpicture}
```

20 Better graphics package for includegraphics

Like avoid showing file name in graph
Solve space in filename issue

```
usepackage{grffile}
```

21 Indent env.

```
\usepackage{enumitem}
```

```
\setlist[description]{leftmargin=\parindent,labelindent=\parindent}
left aligned text
\begin{description}
```

```

\item[One] first item
\item[Two] second item
\item[Three] third item
\end{description}

```

22 Sample TikZ Diagram

```

\tikzset{>=stealth}
\tikzset{every node/.style={distance=.3cm,draw,circle,fill=none}}
\tikzset{label/.style={draw=none,rectangle,fill=none}}

25 Make your own package

Write your own command such as `\newcommand` or `\newenvironment` in their own `.sty` file (example `my_commands.sty`) and then use it in your document `\usepackage{my_commands}`.

Example:

```
\newcommand{\leftright}[2]{  
  \begin{flushleft}  
    #1  
    \begin{flushright}  
      #2  
    \end{flushright}  
  \end{flushleft}  
}
```

Result:

```
\leftright{left}{right}
```

right
